Head of Human Resources  
SecureStrux, LLC  
245 E King St. Suite 200  
Lancaster, PA, 17602

**Dear Head of Human Resources:**

I would like to express my interest at SecureStrux as an Information System Security Officer (ISSO) in Goleta California. I am impressed and fascinated with how SecureStrux assists organizations with Command Cyber Readiness Inspection (CCRI) preparation. During my time in the Air National Guard, I have been a part of two CCRI's. One with the Arkansas Air National Guard, scoring 86 and one with the 48<sup>th</sup> Communications Squadron of RAF Lakenheath UK scoring 85. On both teams I played a critical part in Security Technical Implementations (STIGs) and Network Administration for computer, user, and security groups. With a solid background in compliance on unclassified and classified networks, knowledge of the Risk Management Framework (RMF) for the DoD, and accuracy of initiating and maintaining the Authorization to Operate (ATO's) I am prepared to contribute to SecureStrux.

While working for the Arkansas Air National Guard as the Information System Security Officer I provided critical preparation and leadership in standing up the State's emerging cyber mission. During this time, I ensured a seamless transition from the Defense Intelligence Agency Joint Worldwide Intelligence Communication System to the Air Force worldwide system obtaining the Authorization to Operate in half of the normal time required. This effort helped the Air National Guard's cyber mission attain full mission capability six months ahead of schedule.

I have been in a classified environment working for the DoD for four years and the IT field for eight years. I have worked at multiple levels of IT to include help desk, network control centers, project management, and information assurance/ security. With my military experience combined with my education, I believe I would be a solid candidate for the Information System Security Officer position at SecureStrux. I look forward to hearing from you to discuss my possible future here.

**Sincerely,**

**Corredur J. Vaden**
